March 11, 2016

The Honorable Timothy Massad, Chairman
Commodity Futures Trading Commission
Three Lafayette Centre
1155 21st Street, N.W.
Washington, D.C. 20581

Re: Swap Execution Facility Regulations, Made Available to Trade Determinations, and Swap Trading Requirements

Dear Chairman Massad:

Since the promulgation of the regulations governing swap execution facilities (“SEFs”) pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), Commissioners of the Commodity Futures Trading Commission (“CFTC” or “Commission”) have discussed the Commission’s consideration of potential revisions to various aspects of its swap regulations, including those reforms related to SEFs and trade execution. For example, you have stated that the Commission is “focused on issues concerning trading on [SEFs],” and that you “will ask the Commission to consider a number of rule changes to enhance SEF trading and participation.” Call for the Commission to consider potential revisions to its Dodd-Frank Act regulations have also been raised by Commissioner Bowen and Commissioner Giancarlo. In addition, Commission staff has indicated that they are considering potential no-action relief or guidance with respect to issues that market participants have identified as problematic.

The Wholesale Markets Brokers’ Association, Americas (“WMBAA”) appreciates the Commission’s careful and deliberative approach to the regulation of SEFs and extends its appreciation to the

1 See Keynote Remarks before the Institute of International Bankers Annual Washington Conference (Mar. 7, 2016).
2 See Statement of Commissioner Bowen, Dec. 1, 2014 (stating that “the best way of viewing changes to [the CFTC’s Dodd-Frank Act rulemakings] is not that [the CFTC is] tweak them, but rather that [the CFTC is] enhancing them. Sometimes that may mean making the rules more cost-effective and leaner, but at other times that will mean making them stronger than before. Enhancing a rule can mean reducing burdens to business while strengthening protections for the public”), available at http://www.cftc.gov/PressRoom/SpeechesTestimony/bowenstatement120114.
4 The WMBAA is an independent industry body representing the largest inter-dealer brokers. The founding members of the group—BGC Partners, GFI Group, Tradition, and Tullett Prebon—operate globally, including in the North American wholesale markets, in a broad range of financial products, and have received temporary registration as swap execution facilities. The WMBAA membership collectively employs approximately 4,000 people in the United States; not only in New York City, but in Stamford and Norwalk, Connecticut; Chicago, Illinois; Jersey City and Piscataway, New Jersey; Raleigh, North Carolina; Juno Beach, Florida; Burlington, Massachusetts; and Dallas, Houston, and Sugar Land, Texas. For more information, please see www.wmbaa.com.
Commission for granting permanent registration to each of the member firms’ SEFs earlier this year. This milestone represents a significant step toward firmly establishing the regulatory regime for mandatory trade execution as envisioned by the Dodd-Frank Act and providing market participants with further much-needed regulatory certainty. Against the backdrop of permanent SEF registration, the WMBAA looks forward to continuing to work with the Commission and its staff on all matters pertaining to SEFs, including on any future CFTC rulemakings, amendments, guidance, or interpretations related to trade execution and SEFs, to ensure that the regulations are implemented in accordance with the underlying statutory intent and accomplish the Dodd-Frank Act’s goal of “promot[ing] the trading of swaps on swap execution facilities.”

The WMBAA supports the Commissioners’ recognition that the regulations should be assessed and reconsidered on an ongoing basis. In particular, the WMBAA supports Commission efforts to “formalize through notice-and-comment rulemaking a number of the ‘no-action’ positions the staff has taken, such as simplifying the confirmation process, streamlining the process for correcting error trades, and others.”5 We support the regulatory certainty that formal rule changes would provide to issues related to SEF confirmation and reporting, trades deemed void ab initio,6 and trading of block trades “on facility.” The WMBAA also recognizes that certain reporting requirements may merit reconsideration, including the “embargo rule,” and would welcome the opportunity to discuss such issues further with the Commission.

Further, to assist the Commission and its staff in its assessment of the SEF regulations, the WMBAA respectfully offers the attached matrix in Appendix A, which we have prepared based on our expertise as over-the-counter market operators for over 25 years and a combined tenure in the industry of over 100 years, and our experience to date with the implementation of the SEF related rules. For each of the following topics, the matrix notes the relevant statutory provision, describes the implementation issue experienced by market participants, references the relevant CFTC rule or staff advisory, and suggests a potential recommendation to address the issue. The topics are not presented in order of importance, but rather represent the regulatory implementation issues that the WMBAA members are addressing:

- Methods of execution;
- Made available to trade process;
- Audit trail requirements for voice-based executions;
- Position limits;7
- Financial resource requirements;

6 Revised regulations should permit SEFs to correct clerical or operational errors on swaps rejected for clearing. In addition, if a swap has been accepted by a DCO for clearing, and a clerical or operational error is subsequently identified, the regulations should permit a SEF to correct the error in the trade without initiating a “new trades, old terms” offset and resubmission, provided that the DCO has the operational capability to permit such a correction.

7 A WMBAA white paper on position limits, which was submitted to the Division of Market Oversight staff, is attached hereto as Appendix B.
Chairman Timothy Massad  
March 11, 2016  

Page 3 of 3

- Cross-border issues;
- Margin requirements;
- Embargo rule; and
- SEF recordkeeping requirement.

In addition to the specific issues addressed in the matrix, the WMBAA recommends that the Commission examine the commercial impact of its SEF regulations and other rules on the swap market. Specifically, wherever possible, the Commission should seek to ensure a level playing field between the futures and swap markets for commercially-equivalent risk management contracts by not permitting any unfair regulatory advantage to either market. The WMBAA believes that such regulatory instances, in which a swap market requirement that results in additional costs or creates disincentives for trading swaps relative to the futures market equivalent, should be reconsidered by the Commission.

Lastly, to the extent that Commission action to modify certain swap-related regulations are constrained by statutory language under the Dodd-Frank Act, the WMBAA would welcome the opportunity to work with the Commission to advocate for appropriate legislative changes before Congress. However, the attached list includes solely those issues which the WMBAA believes can be addressed through regulatory action.

* * * * *

We welcome the opportunity to discuss these comments with you at your convenience. Please feel free to contact the undersigned with any questions you may have on our comments.

Sincerely,

William Shields  
Chairman, WMBAA

Enclosure

cc: The Honorable Sharon Bowen, Commissioner  
Mr. Vince McGonagle, Director, Division of Market Oversight
## APPENDIX A: CFTC Part 37 SEF Regulations: Recommended Revisions

<table>
<thead>
<tr>
<th>Relevant Statutory Provision</th>
<th>Issue</th>
<th>CFTC Regulation</th>
<th>Proposed Solution/Revision</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEA § 1(a)(50)</td>
<td>Methods of Execution</td>
<td>Rule 37.9(a)(2)</td>
<td>Add a new clause “(C)” to the execution methods in rule 37.9(a)(2) that expands the permissible methods of execution for Required Transactions to include “or any such other system for trading as may be permitted by the Commission.”</td>
</tr>
<tr>
<td>“The term ‘swap execution facility’ means a trading system or platform in which multiple participants have the ability to execute or trade swaps by accepting bids and offers made by multiple participants in the facility or system, through any means of interstate commerce, including any trading facility, that—“(A) facilitates the execution of swaps between persons; and“(B) is not a designated contract market.”</td>
<td></td>
<td>Codify existing policy that certain systems, including Trading Facilities, fall within the SEF definition and qualify as a permissible method of execution for Required Transactions. Additional methods of execution for Required Transactions should include risk-mitigation. The WMBAA notes that auction-type systems meet the CEA definition of trading facility and, therefore, should be permitted as an acceptable execution method for Required Transactions in their own right and not be subject to the definitions of Order Book or RFQ.</td>
<td></td>
</tr>
<tr>
<td>CEA § 2(h)(8)</td>
<td>Made Available to Trade Process</td>
<td>Rule 37.10(a)(1): “Required submission. A [SEF] that makes a swap available to trade in accordance with paragraph (b) of this section, shall submit to the Commission its determination with respect to such swap as a rule . . . .”</td>
<td>Amend the made available to trade (MAT) process so that going forward, SEFs commence the MAT determination process by filing a petition, but the CFTC has the responsibility of making the determination based on objective criteria and subject to public notice and comment on the petition.</td>
</tr>
<tr>
<td>“(A) IN GENERAL.—With respect to transactions involving swaps subject to the clearing requirement of paragraph (1), counterparties shall—(i) execute the transaction on a board of trade designated as a contract</td>
<td></td>
<td></td>
<td></td>

<td>CFTC Regulation</td>
<td>Proposed Solution/Revision</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>-------</td>
<td>-----------------</td>
<td>----------------------------</td>
</tr>
<tr>
<td>market . . .; or (ii) execute the transaction on a [registered SEF] or a swap execution facility that is exempt from registration . . . (B) EXCEPTION.—The requirements [above] shall not apply if no board of trade or [SEF] makes the swap available to trade or for swap transactions subject to the clearing exception . . .”</td>
<td>registered marketplace.</td>
<td>Rule 37.10(c): “Applicability. Upon a determination that a swap is available to trade on any [SEF] or designated contract market . . . all other [SEFs] and designated contract markets shall comply with the requirements of section 2(h)(8)(A) of the Act in listing or offering such swap for trading.”</td>
<td>In addition, as the WMBAA discussed at the recent DMO roundtable, the Commission should harmonize its MAT decisions with those of foreign regulators, including ESMA, in order to prevent any bifurcation of the swap markets and regulatory arbitrage.</td>
</tr>
<tr>
<td>CEA § 5h(f)(2)(B)(ii) (Core Principle 2) “A [SEF] shall . . . establish and enforce trading, trade processing, and participation rules that will deter abuses and have the capacity to detect, investigate, and enforce those rules, including means . . . to capture information that may be used in establishing whether rule violations have occurred.”</td>
<td><strong>Voice Audit Trail</strong> CFTC staff has expressed a desire that SEFs must be able to store recordings of oral communications in a digital database and convert such recordings into searchable text. In addition, CFTC staff has explored the concept of requiring SEFs to record or access not only the communications between the SEF’s employees and their customers, and any communications between employees, but also the communications of Introducing Brokers. Introducing Brokers already have the obligation under NFA rules to record communications and SEFs have access to such information pursuant to their rulebooks.</td>
<td>Rule 37.205 Commission rule 37.205 sets forth the audit trail requirement for SEFs to “capture and retain all audit trail data necessary to detect, investigate, and prevent customer and market abuses.” The Commission requires that such data is “sufficient to reconstruct all indications of interest, requests for quotes, orders, and trades within a reasonable period of time and to provide evidence of any violations of the rules of the [SEF].” Further, an audit trail must also permit a SEF to “track a customer order from the time of receipt through fill, allocation, or other disposition, and shall include both order and trade data.”</td>
<td>Revise the rules or provide guidance related to audit trail requirements for voice-based executions on SEFs to account for the unique characteristics of voice execution and to recognize the currently available technologies. Any such new rules or guidance would supplement the existing audit trail requirements that are tailored to electronic execution and should more accurately reflect a “technology-neutral” approach to SEF execution. In accordance with the preamble discussion to the final rule, the WMBAA believes that “the intent of the final rules is to require that a SEF establish and maintain an effective audit trail program, not to dictate the method or form for maintaining such information. Importantly, the rule, by not being prescriptive, provides SEFs with flexibility to determine the manner and the technology necessary and appropriate to meet the requirements.”</td>

</tr>
<tr>
<td>CEA § 5h(f)(6) (Core Principle 6)</td>
<td>Position Limits</td>
<td>The elements of an acceptable audit trail program involve (1) original source documents, (2) electronic transaction history database, (3) electronic analysis capability, and (4) safe storage capability.</td>
<td>Specify that SEFs are not obligated to impose position limits or accountability until such time as the Commission determines that such measures are “necessary and appropriate.”</td>
</tr>
</tbody>
</table>

**Position Limits**

SEFs do not possess information about a trader’s position in any given swap or its underlying instrument or commodity. Rather, SEFs only have information about swap transactions that take place on their individual facilities and have no way of knowing whether a particular trade on the facility adds to an existing market-wide position or whether it offsets all or part of an existing position in that swap.

In addition, if SEFs were required to adopt position limits, market participants might abuse such limits. For example, if five SEFs that offer a particular product set their respective limits at a level established by the CFTC, the overall aggregate position available to market participants via trading on such SEFs would be five times greater than the level set by the CFTC. As such, market participants could take advantage of this structure by spreading their transactions across multiple SEFs and DCOs when required.” (emphasis added). 78 Fed. Reg. 33,476, 33,518 (June 4, 2013).

The WMBAA further recommends that the CFTC consider whether the audit trail requirements may be satisfied based on exception or risk-based SEF reviews.

Implementing position limitations or position accountability is not necessary and appropriate at this time because, for example: (1) unlike futures and options where trading and clearing is vertically integrated and each DCM has information about positions in the marketplace for any specific contract, they are not an effective tool for detecting and preventing manipulation and other abuses for swaps; and (2) individual SEFs do not possess information about a trader’s position in any given swap and, therefore, have no basis of reference as to how and when a position limit should be set.

In addition to these comments, the WMBAA has submitted to the Division of Market Oversight (“DMO”) staff a white paper explaining why a SEF position limits and position accountability regime is

<tr>
<td></td>
<td>reaching the limit set by each. While staff has acknowledged that, in lieu of position limits, SEFs may establish accountability provisions related to trades rather than positions, the details of such accountability mechanisms and how accountability levels would be set are yet unclear.</td>
<td>neither necessary nor appropriate. Rather than imposing a position limits regime, the WMBAA respectfully reminds the Commission that a SEF is subject to regulatory requirements to provide data to the Commission, including data related to the trading activity on the SEF, to assist the Commission with monitoring compliance with federal speculative position limits.</td>
<td></td>

<td><strong>CEA § 5h(f)(13) (Core Principle 13)</strong>&lt;br&gt;“(A) IN GENERAL.—The [SEF] shall have adequate financial, operational, and managerial resources to discharge each responsibility of the [SEF].&lt;br&gt;(B) DETERMINATION OF RESOURCE ADEQUACY.—The financial resources of a [SEF] shall be considered to be adequate if the value of the financial resources exceeds the total amount that would enable the [SEF] to cover the operating costs of the [SEF] for a 1-year period, as calculated on a rolling basis.”</td>
<td><strong>SEF Financial Resources</strong>&lt;br&gt;CFTC staff has indicated its preliminary belief that all SEF employees are considered part of the financial obligation, regardless of the employment arrangement, e.g. at-will, contractual, and guaranteed salary. As a result, SEFs with voice-based systems face significantly higher financial resources commitments than those facilities that only provide electronic trading access. The Commission’s rules do not recognize that: (1) SEFs do not possess or maintain client funds or open interest; (2) there is no practical need for any individual SEF to maintain sufficient</td>
<td><strong>Rule 37.1300</strong>&lt;br&gt;<em>Same as statutory provision</em></td>
<td>Flexibly interpret the SEF financial resources requirements to reflect that SEFs are execution venues only and do not ensure contract performance, making their commercial viability less relevant on a post-transaction basis. As the Commission has delegated authority to the DMO Director on issues pertaining to SEF financial resources, the WMBAA looks forward to working with Commission staff to appropriately account for the following considerations in refining the SEF rules, including with respect to creating an appropriate methodology for computing projected operating costs. See Rule 37.1307.</td>
</tr>
<tr>
<td><strong>Same as statutory provision</strong></td>
<td><strong>document.</strong>&lt;br&gt;As an alternative to the above proposed solution, the WMBAA would welcome specific guidance on how SEFs can practically comply with an accountability provision, reflecting that: (1) SEFs do not possess position information; and (2) swaps are fungible in terms of being traded on multiple venues and cleared by multiple DCOs. Any accountability level(s) should be established by the CFTC, taking into account the entirety of market activity in a product (both on and off SEFs), and such established level(s) should be applied uniformly to all SEFs.</td>

<td>resources for a period of one-year after an event that results in the closure of a SEF, as a SEF could wind down its operations in a much shorter time period; and (3) for SEFs with voice brokers, such voice brokers are not necessary to ensure operation of a compliant SEF and could be removed at any point and for any reason without impacting the SEF’s ability to satisfy the Core Principles.</td>
<td>The SEF financial resources requirement should focus on the fixed costs associated with compliant SEF operation and solely those required to ensure compliant operations, rather than the variable costs and costs related to staff that are not core to a compliant operating structure. The WMBAA notes that the costs associated with employing SEF brokers constitute variable costs and are not core to the compliance regime and the operations of a SEF, or necessary or required to operate a compliant SEF, as is demonstrated by other registered SEFs that do not employ brokers. Therefore, costs related to employing SEF brokers should be excluded from the financial resources calculation. Contrary to DMO letter 15-26, any salary or compensation for SEF employee-brokers should not be included in the calculation of projected operating expenses. In addition, the WMBAA has submitted information to DMO staff regarding liquid assets and would welcome any further communication as needed for a rule revision to reduce the burden from six months’ liquid assets to three months’ liquid assets. Any modification of the financial resource rules should take into account the fact that the exit of an individual SEF (or brokers within an operational SEF) would not have broad market-wide or systemic effects on</td>

| Cross-Border Concerns       |       | DSIO Advisory No. 13-69 | Address cross-border issues through a formal rulemaking that invites and addresses public comment. Carefully consider the adoption of equivalency or substituted compliance regimes, such as the establishment of an exempt SEF category, to prevent further fracturing of markets by jurisdiction. Provide guidance regarding who is considered a U.S. person for execution purposes and, consequently, what types of transactions may be conducted off-SEF, such as in the following examples:  
  - A foreign branch of a U.S. person conducting a trade solely in a foreign market with a foreign entity; and  
  - A foreign branch of a U.S. prime broker, acting as a prime broker. |

“The provisions of this Act relating to swaps . . . (including any rule prescribed or regulation promulgated under that Act), shall not apply to activities outside the United States unless those activities—(1) have a direct and significant connection with activities in, or effect on, commerce of the United States; or (2) contravene such rules or regulations as the Commission may prescribe or promulgate as are necessary or appropriate to prevent the evasion of any provision of this Act . . . .”

The scope of the Commission’s cross-border guidance is far reaching such that a permitted transaction involving two non-U.S. counterparties may be subject to SEF execution under footnote 88.

This interpretation has had the practical effect of bifurcating markets based on the participants’ jurisdictions, impeding liquidity and redirecting activity away from SEFs and, as a result, away from U.S. markets and the oversight of U.S. regulators.

“DSIO is of the view that a non-U.S. SD (whether an affiliate or not of a U.S. person) regularly using personnel or agents located in the U.S. to arrange, negotiate, or execute a swap with a non-U.S. person generally would be required to comply with the Transaction-Level Requirements. For the avoidance of doubt, the Division’s view would also apply to a swap between a non-U.S. SD and a non-U.S. person booked in a non-U.S. branch of the non-U.S. SD if the non-U.S. SD is using personnel or agents located in the U.S. to arrange, negotiate, or execute such swap.”

CFTC staff has issued no-action relief letters pertaining to advisory 13-69, including most recently letter 15-48, which extended relief until September 30, 2016.

</table>

|  |  |  | for a foreign customer. |

If the Commission engages in a rulemaking pertaining to an exempt SEF category, any exempt SEF should be required to comply with all material, transaction-level requirements applicable to SEFs. In addition, the Commission should work with foreign regulators to ensure they have a reciprocity provision for U.S.-registered SEFs. Any such CFTC rulemaking for exempt SEFs should condition the relief for the foreign MTF on the existence of a reciprocity provision in law or regulation of the applicable foreign jurisdiction.

In addition, while non-U.S. swap dealers located in the U.S. have received no-action relief from the execution mandate, no corresponding relief has been issued with respect to platforms operating in an execution capacity for such non-U.S. swap dealers located in the U.S., adding to the uncertainty around the implementation of rules. In the interest of stability, no-action relief should be equally granted to participants and platforms where applicable.

<td>To operate efficiently and competitively, information which reflects current market activity must be available to all market participants without any disruptive pauses for the occurrence of other regulatory activities. Every market participant must have real-time information on executed trades for the entire marketplace to ensure effective price discovery so that they can make informed trading decisions. This allows the market to operate properly as a single liquidity pool. In addition, those SEFs that rely on a third party to transmit information to SDRs are further hindered by the embargo rule in their ability to make available to all market participants current market information. dissemination; (B) Such disclosure is only made to market participants on such registered [SEF] . . . ; (C) Market participants are provided advance notice of such disclosure; and (D) Any such disclosure by the registered [SEF] . . . is nondiscriminatory.</td>
<td>implementing the post-trade transparency requirement for public dissemination of swap data as soon as technologically practicable do not artificially restrict a SEF’s ability to efficiently execute swap transactions. Further, the Commission should consider that, due to SDR “rounding” models and “capping” of large notional transactions, the information publicly disclosed is often not identical to specific trade-level information on the SEF.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**CEA § 5h(f)(10)**

“RECORDKEEPING AND REPORTING.— (A) IN GENERAL—A swap execution facility shall—
(i) maintain records of all activities relating to the business of the facility, including a complete audit trail, in a form and manner acceptable to the Commission for a period of 5 years . . . .”

**SEF Recordkeeping Requirement**

CFTC rules requiring SEFs to retain all records through the life of a swap and for at least five years following a swap’s termination is an onerous and impracticable requirement for SEFs. Following the execution of a swap, a SEF is not necessarily made aware of a swap’s termination. Accordingly, it is often impracticable for a SEF to definitively ascertain the period of time for which it must retain records for a swap and can result in significantly burdensome recordkeeping costs. Rule 45.2(c):

“All records required to be kept pursuant to this section shall be retained with respect to each swap throughout the life of the swap and for a period of at least five years following the final termination of the swap.”

Provide guidance to SEFs as to what materials must be retained for five years to satisfy the recordkeeping obligation, which reduces the operational burden of maintaining all possible records, particularly those with minimal value from an audit trail perspective.

For both cleared and uncleared swaps, revise the recordkeeping requirement under rule 45.2 to permit SEFs to retain records with respect to each swap for a period of five years after execution.
APPENDIX B: WMBAA WHITE PAPER REGARDING POSITION LIMITS
I. Introduction

The Wholesale Markets Brokers Association, Americas,¹ the leading industry organization representing the interdealer broker industry, provides this White Paper to explain why a position limits or position accountability regime for swap execution facilities (“SEFs”) is neither necessary nor appropriate.

Section 5h of the Commodity Exchange Act (“CEA”), as added by the 2010 Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank”), includes a series of core principles for SEFs. In the five years since Dodd-Frank was adopted, the Commodity Futures Trading Commission (“CFTC” or “Commission”) has worked to implement Section 5h of the CEA, adopting final regulations related to the core principles and other requirements for SEFs, including core principle number 6 – position limits or accountability. An applicant SEF must comply with core principles to receive its permanent registration from the CFTC.

In practice, as explained in this White Paper, an overly prescriptive interpretation of this core principle would be unworkable, cost-intensive, and without any readily identifiable public policy benefits. While there have been calls for Congressional review of core principle 6,² the WMBAA believes, at this point, the Commission should consider a regulatory solution.

The approach described herein has been recently endorsed by a coalition of SEFs³ and key industry groups.⁴ The WMBAA supports such arguments, particularly that:

The Commission should exempt SEFs from any requirement to enforce compliance with federal limits or to establish SEF limits for contracts subject to federal limits. As an alternative to setting position limits, SEFs should only be required to provide data to the Commission to assist it in monitoring compliance with federal speculative position limits.⁵

---

¹ The WMBAA is an independent industry body representing the largest inter-dealer brokers operating in the North American wholesale markets across a broad range of financial products. The five founding members of the group are: BGC Partners; GFI Group; ICAP; Tradition; and Tullett Prebon. The WMBAA membership collectively employs approximately 4,000 people in the United States; not only in New York City, but in Stamford, Connecticut; Chicago, Illinois; Louisville, Kentucky; Jersey City, New Jersey; Raleigh, North Carolina; and Houston and Sugar Land, Texas. For more information, please see www.wmbaa.org.

⁵ Id. at 35.
The SEF marketplace is still in its formative years. The CFTC has not yet adopted a position limits regime for swaps. The Commission should tread carefully to avoid the imposition of a rigid, unworkable requirement that, without adequate cost-benefit analysis, may harm the development of these markets. Rather, as suggested by Chairman Timothy Massad, the CFTC should work to create “the foundation for the market to thrive” and “permit innovation, freedom and competition.”

II. Background

A. Position Limits, Position Accountability

The CFTC glossary defines a position limit as “[t]he maximum position, either net long or net short, in one commodity future (or option) or in all futures (or options) of one commodity combined that may be held or controlled by one person (other than a person eligible for a hedge exemption) as prescribed by an exchange and/or by the CFTC.” Fundamentally, a position limit caps the size of a position that a trader may hold or control for speculative purposes in a derivatives contract in a particular commodity. There are three elements of the regulatory framework for position limits: the levels of the limits, the exemptions from the limits (such as for hedging), and the policy on aggregating accounts. While the CFTC has set certain commodity position limits, it has not yet established position limits for swaps.

By contrast, the CFTC glossary defines position accountability as “[a] rule adopted by an exchange in lieu of position limits requiring persons holding a certain number of outstanding contracts to report the nature of the position, trading strategy, and hedging information of the position to the exchange, upon request of the exchange.” Position accountability does not, by definition, impose a hard limitation on traders’ speculative derivatives positions in a commodity. Instead, position accountability provisions grant the exchange additional powers to protect its markets, including the ability to obtain additional information from the trader and to limit the size of a trader’s position, when a trader’s derivatives position exceeds a specified level.

B. SEFs and Position Limits

Core principle 6 – codified as CEA Section 5h(f)(6) – mandates that a SEF “that is a trading facility” must “adopt for each of the contracts of the facility, as is necessary and appropriate, position limitations or position accountability for speculators.” Furthermore, “[f]or any contract that is subject to a position limitation established by the Commission pursuant to section 4a(a) of the [CEA], the [SEF] shall (i) set its position limitation at a level no higher than the Commission limitation; and (ii) monitor positions established on or through the [SEF] for compliance with the limit set by the Commission and the limit, if any, set by the [SEF].”

The CFTC promulgated rule 37.600 by codifying the statutory language. In the preamble to the final SEF rule, the CFTC noted that “[s]everal commenters stated that SEFs will have difficulty enforcing position limitations” because “SEFs will lack knowledge of a market participant’s activity on other venues, and that will prevent a SEF from being able to calculate the true position of a market participant.” Furthermore,
the CFTC describes the guidance and acceptable practices in appendix B to the part 37 rules as giving “reasonable discretion to comply with § 37.600.”

With respect to core principle 6, the guidance in Appendix B states that:

For Required Transactions, a SEF may demonstrate compliance by setting and enforcing position limitations or position accountability levels only with respect to trading on the SEF’s own market. For example, a SEF could satisfy the position accountability requirement by setting up a compliance program that continuously monitors the trading activity of its market participants and has procedures in place for remedying any violations of position levels.

For Permitted Transactions, a SEF may demonstrate compliance by setting and enforcing position accountability levels or sending the Commission a list of Permitted Transactions traded on the SEF. Therefore, a SEF is not required to monitor its market participants’ activity on other venues with respect to monitoring position limits.

III. Role of Exchange-set Position Limits and Position Accountability

In contrast to SEFs and position limits, the CFTC has historically adopted position limits for certain agricultural commodities and also has required exchanges, as part of their self-regulatory responsibilities, to adopt position limits or position accountability provisions in their market surveillance programs. Unlike the OTC swap market, futures contracts traded on exchange are owned and exclusively listed by an exchange. They are unique contracts that are unavailable anywhere else.

When the CFTC first promulgated speculative position limits, it noted that “the capacity of any contract to absorb the establishment and liquidation of large speculative positions in an orderly manner is related to the relative size of such positions, i.e., the capacity of the market is not unlimited.” In the early 1990s, the CFTC adopted rules allowing exchanges to establish position accountability provisions, in lieu of position limits, for contracts that had been subject to exchange-set speculative position limits.

Exchange-based position limits have been adopted by designated contract markets ("DCMs"), or futures exchanges, and the position limits (or position accountability) provisions have been enforced through exchange rulebooks and their role as a self-regulatory organization conducting market surveillance programs. These protections serve as a prophylactic tool to reduce the threats of market power and to ensure the integrity of and orderly trading in the derivatives market. Exchange-set position limit and position accountability rules help prevent traders from accumulating concentrated positions that could disrupt a market and cause artificial prices and disorderly trading, such as purposefully through the exercise of market power by the position holder (e.g., actual or attempted manipulation) or to prevent one trader from negatively impacting market stability by liquidating too large of a position.

These rules obligate an exchange, as part of its market surveillance effort, to take account of large positions in their market either by imposing hard limits on traders’ speculative positions or, in the case of position accountability, by providing exchanges with ways to address the market impact of large positions.

IV. SEFs Cannot Adopt an Exchange-centric Position Limits or Accountability Regime

Exchange-based surveillance and position limit and position accountability regimes focus on market participants’ concentrated speculative positions. CFTC staff has stated that “an acceptable market surveillance program should regularly collect and evaluate market data to determine whether markets are responding to the forces of supply and demand. An exchange also should have routine access to the positions and trading of its market participants.”

Exchanges can readily adopt and enforce position limits or position accountability provisions for futures and futures options because they have the means to carry out this oversight function. As mentioned before, exchanges own their contracts, the trading of which is only allowed on its respective exchange, and exchanges also own and operate the derivatives clearing organizations (“DCOs”), or direct trades to specified DCOs, that process and become the counterparty to each transaction executed on the exchange. Further, unlike futures on physical commodities for which the underlying products are in limited supply, the financial instruments underlying swaps subject to the trade execution mandate (interest rate and credit default swap indices) generally have very large or nearly inexhaustible deliverable supplies and a cash market sufficiently liquid to render swaps traded on those instruments highly unlikely to be susceptible to the threat of manipulation.

Exchanges also have “large trader reporting systems” designed to obtain current information about traders’ positions in their derivatives markets. Futures exchanges possess data showing the positions held by all reportable traders for each trading day based on reports from clearing members, futures commission merchants, and foreign brokers detailing close-of-business position data. Each futures exchange’s “large trader reporting system” also provides information on the account’s ownership and control and identifies futures and options traders who trade for the account. By assigning unique identification numbers to each trader, futures exchanges can aggregate traders’ positions across different accounts at multiple clearing members to include the positions of all related affiliates.

By contrast, SEFs are trading platforms that merely foster liquidity for swap execution. They do not have any ownership or proprietary control over the products bought and sold on their platforms. SEFs do not hold customer funds. They do not guarantee performance by counterparties. And, most importantly as discussed below, SEFs do not possess information about a trader’s position in any given swap.

A. Position Limits

Under Section 4a of the CEA, the Commission is required to establish position limits only after it determines that such position limits are necessary and appropriate. To date, the CFTC has not made that determination for financial swaps and, as a result, has not established position limits for these products. However, even if such limits were put in place, SEFs are limited in their ability to monitor for position limits violations. SEFs can only monitor market activity for those transactions that take place on its trading system or facility. A SEF only has information about trading activity on its facility and does not possess, and has limited means to obtain, information about its participants’ positions in swaps from activity on other venues. There are currently 24 applicant SEFs, making it impossible for any one SEF to know how its participants may transact on the 23 other platforms.

In practice, while a participant may enter into a transaction of size on one SEF, the SEF has no way of knowing if the participant has offset (or increased) its position in the swap through trading on other platforms. A swap that is listed and traded on one SEF may, unbeknownst to that SEF, be traded on other SEFs, DCMs, or bilaterally between counterparties away from any SEF or DCM. As a result, SEFs and DCMs listing swaps do not possess information about a trader’s position in any given swap.

Position limit information is more appropriately collected by other segments of the swap market, including market participants, DCOs, and swap data repositories (“SDRs”). However, even a DCO or SDR would only have information about traders’ cleared positions or reported positions at its individual organization. Only the participants themselves would have information about their overall cleared and uncleared swaps position in a market.

As a result, it is the WMBAA’s view that only the CFTC (or a self-regulatory body possessing position information about swap market participants from SDR and DCO reports) can effectively police the swaps market to detect position limit violations and have the enforcement tools to take meaningful action to deal with violations. Imposing a position-based requirement on SEFs would be ineffective and would incur significant redundancies, potential miscounting or double counting of trades, and significant impediments related to data standards among the 24 applicant SEFs. In addition, if all of the SEFs set their individual position limit thresholds equal to the not-yet adopted CFTC’s limits, this regime could encourage “gaming” by market participants who could spread their activity across SEFs to avoid triggering a “limit check” by any one SEF.

B. Position Accountability

As the National Futures Association (“NFA”) recently concluded after conducting a data-driven analysis, position accountability levels will do little to “reduce the potential threat of market manipulation or congestion, the stated goal of the [SEF core principles].”16

The WMBAA believes the concept of a SEF position accountability regime is flawed. Most importantly, as discussed above, position accountability is meaningful as a market surveillance tool only in the context of centralized marketplaces such as exchanges, which is due to the fact that they own the products traded and possess information about traders’ actual positions in the relevant derivatives marketplace. Because SEFs do not own products, and therefore do not possess the same position information, it is not necessary or appropriate for SEFs to adopt position accountability.

Moreover, recognizing the impracticability of SEFs adopting position limits or position accountability regimes, there have been suggestions that SEFs adopt, in effect, “trading accountability” provisions as a means of complying with core principle 6 (i.e., SEFs would institute enhanced oversight of and data gathering from a trader based solely on trading activity or the size of transactions). This suggestion is problematic for two reasons. First, the CEA, as amended by Dodd-Frank, does not contemplate a trading activity-based accountability regime, but rather contemplates a position management-focused component. Furthermore, there is no clear metric available for SEFs to conduct a position accountability framework. As identified by the NFA in its recent report, “[n]otional transaction size alone is a misleading measure of risk.”17 The NFA further concluded that “the swap market might not lend itself to notional transaction size accountability levels at the SEF level.”18

V. Conclusions

The WMBAA has always supported efforts to promote stability, efficiency, transparency, and competition in furtherance of Dodd-Frank’s goal to promote the trading of swaps on SEFs. This includes taking steps to minimize threats posed to swap markets, including market manipulation from concentrated positions in a certain swap.

For the reasons previously stated, however, the WMBAA does not believe that a SEF-based position limit or position accountability regime is necessary or appropriate to meet the purposes set forth in Dodd-Frank.

The WMBAA members and other competitor SEFs want to be part of the solution. These venues are bound by a series of core principles to ensure fair, vibrant markets. They provide daily CFTC Part 16 lists of transactions to the CFTC, and they transmit full trade details to SDRs pursuant to their Part 43 and Part 45 confirmation and reporting obligations. These data transmissions provide the CFTC with the ability to combine data across SEFs to monitor large positions and address position limit violations should the CFTC determine to establish position limits or position accountability provisions for swap contracts.

In considering ways to monitor swap markets for excessive positions, only the CFTC, or a CFTC designated neutral third-party self-regulatory organization would be in the position to collect, maintain, and synthesize the data to perform this function in an efficient, cost-sensitive manner. SEFs operating within the unique framework of the execution-only, competitive SEF landscape, in contrast to the vertically-integrated futures market structure, are ill-suited to establish a position limits or accountability regime.
